

INTEGRITY MACHINERY MOVING

The
Original Morgans

Integrity Machinery Moving - is a new option for your Machinery Moving, Millwright Services, and Machine Tool Installation needs. While we are based in Portland Oregon in the Pacific Northwest, we will go where the work is. We recognized a need to return the art of machinery moving to its simplest form, and to a price point that is more in keeping with the costs associated with the service. Moving your machines shouldn't cost as much as the machine itself! We're making customer service a top priority and ensuring that it runs throughout our organization, from the top down.

Our proposals are simple. We know what's expected, you know what's expected, why do we need 3 pages of qualifiers to ensure that nobody is being taken advantage of? We're taking it back as close as possible to a handshake!

Our staff has far more experience than our "newborn" business would have you suspect. In all likelihood, the faces that you'll see on our crews and in our offices, will not be new to you! We have the experience, vision, and equipment necessary to provide you with the safest, most cost effective services possible.

Make a move with Integrity, we promise, you won't go back...

Integrity - Insist On It!
